

Jérémy Polizzi

AI & Automation Project Manager

Business Systems - Integrations - IT Operations

jeremy.polizzi@live.com | +33 6 49 88 90 07 | linkedin.com/in/jeremypolizzi | Cannes, France | [Online CV](#)

Permanent role - Immediately available - On-site in Cannes - Remote across France and internationally

Profile

AI and Automation Project Manager with 13 years of experience in enterprise IT, spanning infrastructure roles and project management assignments. I turn operational needs into business systems, define their rules, lead AI-assisted development, and test, deploy, document, and operate the resulting solutions. Seeking a permanent role focused on reliable, practical, and measurable automation.

Core skills

Solution delivery: requirements analysis, scoping, business rules, prioritisation, acceptance testing, deployment, documentation, continuous improvement.

AI and automation: AI agents, LLM orchestration, Claude Code, Codex, Make, Airtable, CRM, databases, and AI-assisted formulas.

Applications and integrations: REST APIs, webhooks, Next.js, TypeScript, Bun, Google Sheets API, Git, GitHub Actions, automated testing.

Systems and data: Linux, WSL, SSH, systemd, PowerShell, Windows, GA4, GTM, and dashboards.

Selected projects

Business cockpit for computer purchasing and resale - 2026

Designed the solution, led AI-assisted development, and deployed a cockpit covering purchasing, inventory, PC assembly, pricing, margins, and ROI. Automated, human-supervised extraction of purchase data from Gmail and an IMAP mailbox, with Google Sheets as the business system of record. Managed 179 catalogue and stock records, with ongoing improvements.

Windows 11 PC preparation automation - 2026

Designed a 21-step workflow covering Windows, drivers, updates, applications, optimisation, and validation. Reduced preparation time from about 4 hours of manual work to under 20 minutes, depending on the machine, with no human intervention during execution, plus recovery, logs, and reports.

AI agent orchestrator connected to a task manager - 2026

Designed a TypeScript and Bun pipeline to qualify and execute tasks sequentially, with persistent state, locking, failure recovery, alerts, systemd scheduling, and unit, integration, and chaos testing.

Professional experience

Independent Consultant - Digital Solutions and Automation | May 2023 - present

plus-de-clients.fr

Supported 30+ B2B clients with digital strategy and tools: Airtable CRMs, Make workflows, GA4 and GTM tracking, APIs, webhooks, and dashboards. Handled requirements analysis and business-rule definition, led AI-assisted development, and managed testing, deployment, documentation, and operations.

Sports Coach and Online Business Operator | Jan 2021 - Jun 2023

SLV CrossFit and online coaching - activity run in parallel from May 2023

Designed training programmes, delivered remote coaching, and independently managed an online activity and its clients.

IT Consultant - Enterprise Infrastructure | Sep 2007 - Jun 2020

Altran (Consultant Engineer, 5.5 years): Amadeus - Project Manager, 2 years; PRO BTP - Application Administration and JBoss, 2 years; Orange - Systems Administration and Hadoop, 1 year.

ESR (IT Consultant, 5 years): IBM GBS - Administration of 100+ servers, 4 years.

La Banque Postale - Networks and Security, 2 years.

Business Development and IT Manager | 2005 - 2007

Fernando Télécom

Created an IT department, managed a five-person team, and delivered computer maintenance, secure Wi-Fi networks, and customer support.
